EDITORIAL

In a rapidly evolving economic environment, international expansion has become a key structural challenge for companies in Algeria's construction and public works sector. Long focused on meeting domestic demand, these companies are now encouraged to broaden their horizons and align their growth with an export-oriented strategy.

BATIS EXPORT, an extension of **BATIS**, supports stakeholders in the construction and public works sector who are engaged in this outward-looking dynamic. More than just a directory, it is designed as a visibility and networking tool, serving both companies and institutions involved in the promotion of foreign trade.

Through a selection of companies, this publication highlights expertise, know-how, and offerings tailored to the requirements of international markets. Illustrated product sheets further enhance the content, providing a concrete and visual dimension to the solutions presented.

Distributed to institutions and organizations connected to export activities, **BATIS EXPORT** aims to become an effective promotional platform for companies in the sector. It is fully aligned with efforts to encourage a stronger presence in international markets.

We are pleased to present the first edition of **BATIS EXPORT**, released this May thanks to the support and commitment of our advertisers.

We wish you a productive and rewarding experience with **BATIS EXPORT**.

Activity : Founded in 1966, TUBOPLAST reached its industrial scale in 1976 after being taken over by Mr.TOUMI Messaoud Mustapha, who brought over 55 years of experience in plastics processing, adapting to the evolving needs of the national market. Thus, TUBOPLAST has contributed to the gradual replacement of traditional materials (cast iron, asbestos, steel) with LDPE, PVC, and HDPE plastics in the manufacture of pipes, ensuring that the needs of national and international stakeholders in the fields of hydraulics, public works, construction, agriculture, industry, and the environment are met.

Products : UPVC PIPE (pressure and sewage pipe). HDPE PIPE (pressure water pipe). UPVC DRILL PIPE (slotted threaded UPVC PIPE).

Certification : ISO 9001-2015 / AE SONELGAZ / TEDJ & ACS WATER PE PIPE

Key Export Markets : Maghreb, North and West Africa.

Industrial Zone Bellara,
El-Milia, Jijel, Algeria.

REINFORCING BAR (REBAR)

Hot-rolled, multi-purpose steel product for high-adhesion construction, weldable, grade RB 500.

The weldable rebar produced by AQS complies with the requirements of the interministerial decree of March 8, 1997, standard NA2015) 8634), and ISO 2015) 2-6935).

Technical Specifications

1. Production Capacity

Approximately 1.5 million tons/year

2. Product Range

High-adhesion rebar (deformed rebar)

Available Diameters: Ø 8 mm to Ø 40 mm

Custom diameters can be produced upon request

3. Bar Lengths

Standard Length: 12 m (100+ mm / 0-)

Special lengths up to 18 m available upon request

4. Packaging (Bundles)

Bars Delivered in homogeneous bundles

Standard weight: ≈ 2 metric tons per bundle (for 12 m)

Up to 3 metric tons available upon customer request

5. Packaging

Compact packaging

5 double ties with 7 mm wire for 12 m bars

Packaging adapted according to bar length

6. Available diameters

Ø 40 ,32 ,25 ,20 ,16 ,14 ,12 ,10 ,8 mm

see
p.11

WIRE ROD

High quality round section wire rod with diameters ranging from 5.5 mm to 14 mm.

Technical Specifications

1. Production Capacity

Approximately 0.5 million tons/year

2. Product Range

Wire rod

Reinforcing steel coil

Available diameters: Ø 5.5 mm to Ø 14 mm

Custom production possible in 0.5 mm increments

3. Product Type

Standard wire rod

Reinforcing steel coil

4. Packaging (coil)

Weight: ≈ 2 tons per coil

Dimensions :

Inner diameter: 850–800 mm

Outer diameter: 1250–1200 mm

Height: up to 2000 mm (depending on diameter)

5. Packaging

Compact packaging

4 ties of 7 mm wire

Single or double ties depending on : diameter, application, requirement customer

6. Available diameters

Wire rod: Ø 14 ,10 ,9 ,8 ,6 ,5.5 mm

Rebar in coil: Ø 5.5 to 14 mm (with intermediate variations)

see
p.11

BILLET

A billet is a section of metal used to roll into bars and profiles. It can be produced from ingots or directly by continuous casting. Billets are used as raw materials or for extrusion, forging, rolling, and other metal processing operations.

Technical Specifications

1. Product Designation

B500WR grade steel billet, intended for rolling to produce high-adhesion steel for reinforced concrete.

2. Chemical Composition

Carbon (C) : 0.19–0.22%

Silicon (Si) : 0.15–0.30%

Manganese (Mn) : 0.60–0.80%

Phosphorus (P) : $\leq 0.045\%$

Sulfur (S) : $\leq 0.030\%$

Other elements (Cu, Ni, Cr, Mo, V, Pb) :
in small, controlled proportions

Trace elements : Aluminum $\leq 0.005\%$,

Arsenic $\leq 0.003\%$

Carbon equivalent (CEQ): ≤ 0.45

3. General Characteristics

Product free from internal and surface defects

Suitable for rolling high-adhesion reinforcing bars

Complies with NA86342015/ and ISO standards 693520154/2-.

Packaging (coil)

Weight: ≈ 2 tons per coil

Dimensions:

Inner diameter: 800–850 mm

Outer diameter: 1200–1250 mm

Height: up to 2000 mm (depending on diameter)

4. Geometric Characteristics

Cross-section: 150×150 mm

Length: $12 \text{ m} \pm 30 \text{ mm}$

Dimensional tolerance: $\pm 2\%$

Deformation (rhomboidity): max 8 mm

Torsion: $\leq 0.8^\circ/\text{m}$ (max 8° over 12 m)

Drawdown (camber): $\leq 5 \text{ mm}/\text{m}$

Surface defects: $\leq 2.5\%$

5. Manufacturing Process

Electric arc furnace

Ladle furnace

Continuous casting

Preheating $> 1000^\circ\text{C}$

Argon/nitrogen injection for thermal control

Shrouding of the metal during casting

see
p.11

LIME

AQS produces high-quality calcined lime and dolomite for captive consumption with a combined annual production capacity of 280,000 metric tons.

High-quality lime and dolomite are widely used as fluxes in steel refining.

In the electric arc furnace, lime is particularly useful for removing phosphorus, sulfur, silica, and negligible amounts of manganese.

Lime and dolomite are also used to perform other critical functions such as fine-tuning steel chemistry, reducing oxygen content, and reducing slag-trapped inclusions.

Technical Specifications

1. Production Capacity

Combined annual capacity : $\approx 280,000$ tons

Production primarily dedicated to domestic consumption (steel industry)

2. Products

High-purity calcined lime (lime)

Dolomite (dolomitic lime)

3. Specifications – Lime

$\text{CaO} : \geq 94\%$

$\text{MgO} : \leq 1.5\%$

$\text{SiO}_2 : \leq 2\%$

$\text{CO}_2 : \leq 5\%$

$\text{H}_2\text{O} : \leq 0.5\%$

Loss on Ignition (LOI) : $\leq 5\%$

Apparent Density : $\approx 1 \text{ t/m}^3$

4. Specifications – Dolomite

$\text{CaO} : 57\text{--}60\%$

$\text{MgO} : 35\text{--}40\%$

$\text{SiO}_2 : \approx 2.4\%$

Sulfur (S) : $\leq 0.2\%$

$\text{CO}_2 : \leq 5\%$

$\text{H}_2\text{O} : \leq 0.5\%$

Apparent density : $\approx 1 \text{ t/m}^3$

5. Main use

Used as fluxes in steelmaking

Essential in electric arc furnaces (EAF)

6. Key functions in the steelmaking process

Removal of impurities: phosphorus, sulfur, silica, traces of manganese

Adjustment of the steel's chemical composition

Oxygen reduction

Reduction of inclusions in the metal (via slag)

see
p.11

CDRI (Cold Direct Reduced Iron)

CDRI is the product of the direct reduction unit; first, it will be stored in product passivation silos and transported by conveyors. Afterward, it will be stored in the warehouse for further use. The production rate is 312 t/h. Assuming 8,000 operating hours per year, this equates to an annual production of 2.500.000 tons.

Technical Specifications

1. Product Nature

Directly Reduced Iron (DRI) in pellet form

Color : Gray

Essential intermediate product for the steel industry

2. Physical Characteristics

Average Size : 6.3–18 mm

Oversized (>18 mm) : ≤ 5%

Fine (≈ 0.6–3 mm) : Very low (<1% target)

Break Density : 1.60–1.90 t/m³

3. Chemical Composition

Total Iron (T.Fe) : ≥ 89.5%

Metallistic Iron (M.Fe) : ≥ 84.2%

Metallization : ≈ 94–95%

Carbon (C) : 1.5–2.5%

Sulfur (S) : ≤ 0.01%

Gangal : 3.5–4.5% %

Other oxides : ≤ 0.5%

4. Properties and behavior

High metallization (high usable iron content)

Can reoxidize in the presence of moisture (exothermic reaction)

Must be stored under controlled conditions (protected from moisture)

5. Manufacturing process

Reduction of iron ore at 900–1000°C

Main reactions :

Storage after passivation in secure silos

6. Main us

Metallic raw material for electric arc furnaces (EAF)

Applications :

Flat steels

Long products (construction)

Specialty steels

Shrouding of the metal during casting

U-PVC DRILL PIPES

For multiple applications : Hydraulic, Industry, Agriculture, Environment

U-PVC DRILL PIPE BLUE COLOR THREADED AND SLOTTED

DIAMETERS DN 110 UP TO 400mm / DIN 4925 / ISO 1452- NA 7746

Application : Hydraulic, Agriculture, Environment, Industry

Inscriptions : DRILING PIPE / LOT / DATE / REF / ...

Dimension : Length 4 ML / 6 ML

U-PVC DRILL PIPES according to International standard

We give full guarantee of our products for use in accordance with specifications contained in the standards as per technical specifications by application.

U-PVC SEWAGE AND PRESSURE PIPES

For multiple applications : Hydraulic, Public works, Construction, Industry, Agriculture, Environment, Telecom...

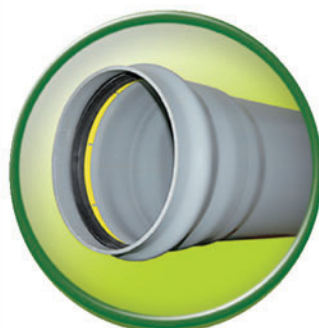

U-PVC PIPE UP TO 630mm / ISO 1452 - EN1401 GRAY COLOR with SEAL integrated or to be glued

Application : Sanitation / Sewage under pressure / Cable routing Electric / Telecom / Video...

Inscriptions : Length 6ML / including nesting / Marking DN PN / SN-CR / Manufacturer...

U-PVC pipes sewage and pressure both PN 04 and PN06 - PN 10 and PN16 are intended for use as sanitation and sheath according to International standard.

We give full guarantee of our products for use in accordance with specifications contained in the standards as per technical specifications by application.

GENERATOR SET

The diesel generator set is a high-performance and reliable power solution designed to ensure continuous electrical supply for industrial, commercial, and residential applications. Built with a robust engine and a high-efficiency alternator, this generator provides stable voltage, low harmonic distortion, and excellent fuel efficiency. Its soundproof canopy ensures reduced noise levels, while the reinforced steel structure guarantees long-term durability even in harsh environments. Equipped with a modern digital control panel, the generator allows real-time monitoring of all electrical and mechanical parameters, making operation safer and easier.

Technical Features

Engine : 4-stroke diesel engine, water-cooled, turbocharged, with direct injection and electric start.

Alternator : Brushless alternator with 100% copper winding, AVR regulation, $\pm 1\%$ voltage stability, IP21/IP23 protection.

Control Panel : Digital controller (Smartgen / DeepSea / ComAp) with full protections (high temperature, low oil pressure, overload, over/under voltage & frequency).
Structure & Canopy : Soundproof and weather-resistant steel canopy, heavy-duty base frame, integrated anti-vibration mounts.

Fuel System : High-capacity fuel tank with 8–12 hours autonomy, fuel level indicator, reinforced fuel lines.

Electrical System : Circuit breaker, battery charger, output terminal board, ATS compatibility (automatic transfer).

Performance : Low fuel consumption, stable voltage, noise level 65–75 dB at 7 m, compliant with ISO 8528 & CE standards.

UPS - UNINTERRUPTIBLE POWER SUPPLY

The UPS is an advanced power protection device designed to provide clean, stable, and uninterrupted electricity to sensitive equipment. Using double-conversion online technology, it isolates the load from the grid and delivers a pure, constant sine wave output. The UPS protects against power outages, fluctuations, surges, and electrical disturbances, ensuring maximum reliability for critical applications such as data centers, hospitals, telecom sites, and industrial systems.

Technical Features

Technology : Online double conversion (VFI), pure sine wave output, automatic bypass.

Input : Wide voltage range, 50/60 Hz auto-sensing, power factor correction, surge protection.

Output : $\pm 1\%$ voltage regulation, high overload capacity, output power factor 0.8–1.0.

Battery : Sealed batteries or lithium options, intelligent battery management, extended autonomy possible.

Control : LCD/LED display, full monitoring of voltage, frequency, load, alarms; USB/RS232/SNMP communication.

Protection : Overload, short-circuit, high temperature, battery overcharge, and automatic bypass.

Design : Compact, low noise, efficient cooling, suitable for tower or rack installation; compliant with IEC/EN 62040 and CE standards.

Scan for complete technical sheet

VOLTAGE STABILIZER

The Voltage Stabilizer is a high-precision device designed to deliver stable and regulated voltage for sensitive equipment.

It eliminates fluctuations, protects against over-voltage and under-voltage, and ensures reliable performance for industrial, commercial, and residential applications.

Technical Features

- Automatic Voltage Regulation (AVR)
- Wide input voltage range
- $\pm 1-3\%$ output voltage accuracy
- Fast correction response
- Protection against over-voltage, under-voltage, overload, overheating, and short-circuit
- Digital display for real-time voltage monitoring
- Robust metal housing with efficient cooling

URBAN BENCH + FLOWER BOX

A perfect solution to beautify and revitalize your outdoor spaces. This furniture combines contemporary design, robustness and functionality, blending harmoniously into urban spaces, gardens and public squares.

Designed for everyone ! Its comfort and aesthetics make it an ideal asset for all generations, creating friendly and welcoming spaces.

Technical Features

Use

Urban bench + Flower box

Users

All ages

Locations

Urban spaces, gardens, courtyards, etc.

Composition

Solid wood panels (red wood)

Galvanized steel flower box

Dimensions

2.5 x 0.7 x 0.45 m

PUBLIC BENCH

Furniture designed for outdoor or indoor use, with a maximum length of 1800 mm, a maximum width of 600 mm and a maximum height of 910 mm.

It is composed of solid wood slats (red wood) offering a natural and aesthetic finish, resting on a galvanized steel frame guaranteeing excellent mechanical resistance and long-lasting protection against corrosion.

Technical Features

Dimensions :

- Length $\leq$ 1800 mm
- Width $\leq$ 600 mm
- Height $\leq$ 910 mm

Material :

- Solid wood slats (redwood)
- Galvanized steel frame

WOODEN PALLET

This heavy-duty unit has a maximum length of 1200 mm, a maximum width of 1000 mm, and a maximum height of 162 mm. Its structure allows for a maximum load of up to 1250 kg, while maintaining a weight not exceeding 35 kg. Made from high-quality wood planks, particleboard, or white wood, it offers a good balance between strength, durability, and ease of handling.

Technical Features

Dimensions :

- Length $\leq$ 1200 mm
- Width $\leq$ 1000 mm
- Height $\leq$ 162 mm
- Weight $\leq$ 35 kg
- Maximum load $\leq$ 1250 kg

Material :

- High-quality wood boards, particleboard, or white wood

ALUMINUM DOOR

French-style opening aluminum door. It features double-glazed, frosted glass offering both privacy and light.

Its sandwich panel construction with integrated thermal insulation ensures good energy efficiency. Its matte grey finish adds a modern and elegant touch, suitable for both residential and commercial spaces.

Technical Features

- Opening : French style
- Double-glazed with frosted glass
- Infill : Sandwich panel
- Thermal insulation and sandwich construction
- Color : Matte Gray
